

LOUDSPEAKER

# TESTING CAPABILITIES

Stetron's highly qualified Audio Engineers take the guesswork out of audio. We strive to provide the highest level of customer and technical support in the industry. We work with customers to fully understand their audio requirements and help them design solutions that meet their requirements.

## IMPEDANCE TEST

Perform Impedance test on DUT

1

ANALYZE

FREQUENCY

MOUNT

DUT

2

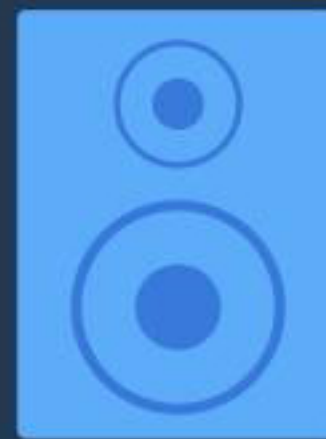

## STIMULUS

Mount DUT on IEC 268-5 baffle located in an anechoic chamber and apply a stimulus generated either by CLIO or SoundCheck to the DUT

## CAPTURE

Capture acoustic data as THD, Frequency response or Thiele Small Parameters

3

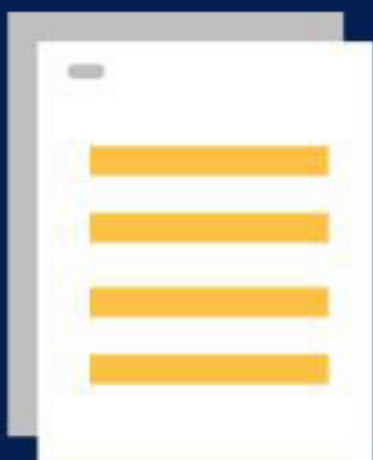

ACOUSTIC

DATA

4

## DATA & REPORT

Perform data processing and report generation
